PROFESSIONAL SUMMARY

Computer Science graduate (AI & ML) with hands-on experience contributing to production software products from development through deployment. Brings strong problem-solving ability, a solid foundation in core software engineering, and experience collaborating across teams to deliver reliable, user-focused solutions. Eager to grow as a Software Engineer by building, testing, debugging, and improving scalable systems. Experienced in translating product requirements into practical, maintainable solutions while learning quickly in fast-moving engineering environments.

EDUCATION

Kommuri Pratap Reddy Institute of Technology, Hyderabad — B.Tech., CSE (AI&ML) Nov 2022 – May 2026

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Data Analytics, Machine Learning, Deep Learning, Artificial Intelligence, Natural Language Processing, Cloud Computing.

PROFESSIONAL EXPERIENCE

Product Development Engineer — matrixO | Hyderabad, India Jun 2023 – Present

- Directed end-to-end development of technology-driven platform scaled 0 to 2,000+ users, maintained 99.9% uptime and reduced the build time in deployment from product design to deployment using Next.js 14, React, tsx, Firebase, Vercel and error handling
- Built and deployed full-stack web applications using modern development frameworks, cloud technologies, and AI-driven automation tools while ensuring scalability and user-centric design with maintained OpenRouter and other API Routes for capabilities
- Collaborated with cross-functional engineering, product, marketing, and operations teams, strengthening stakeholder communication and delivering scalable technology solutions using TypeScript strict mode, Firebase Auth, Firestore and Cloud Storage

AI Intern Trainee — Intel Ignite (Unnati Program) | Remote Apr 2024 – Jul 2024

- Applied AI, Machine Learning, and NLP concepts through industry-focused projects and technical training, strengthening practical understanding and skills of real-world AI applications and software development.

Tech & Media Team Ambassador — Dell Technologies India | Hyderabad, India | Hybrid Mar 2026 – Jun 2026

- Represented Dell facilitating hands-on testing of their new AI laptops across 2 AI-focused tech events, community initiatives, and social media campaigns, engaging with 100+ attendees while strengthening technical advocacy and public speaking.

Technical Lead — OSSEB | Hyderabad, India | Hybrid Oct 2023 – Mar 2024

- Led Innovative IoT and Arduino-based projects while leading technical team, mentoring peers for successful project execution.
- Guided team members in technical implementation, project planning, collaborative problem-solving.

ACADEMIC PROJECTS

- pAIr – Policy AI Regulator (Multi-Agent AI, Generative AI, Full-Stack Development):** Integrated automated policy compliance monitoring workflows simulating real-world service management and incident tracking pipelines. Led development of an AI-powered compliance intelligence platform for MSMEs using Gemini API, FastAPI, React and Firebase; risk assessment analysis, and government scheme recommendations in 15+ languages. **Achieved Runner-Up recognition at SAP Code Unnati Innovation Marathon.**
- PropChain – Decentralized Real Estate Platform (Blockchain, Smart Contracts, Web3):** Built a blockchain-based real estate platform enabling fractional ownership of land assets through tokenization; **implemented ERC-1155 smart contracts** using Solidity on Avalanche blockchain for secure asset ownership and transfers.
- EduGuardian (AI, EdTech, Content Automation):** Built an AI-powered educational platform for **Google Solution Challenge 2025** that automates and personalizes learning content generation, improving accessibility and scalability of educational resources.
- Multimodal Emotion Detection System (Deep Learning, NLP, Computer Vision):** Designed an AI-driven emotion recognition system using NLP and machine learning techniques to analyze user inputs and facial expressions, enabling intelligent emotional state prediction and response generation.
- Intelligent Entity Extraction from Product Images (CV, ML):** Implemented an AI-powered entity extraction system that identifies product attributes such as weight, dimensions, and volume directly from images of Amazon Products, leveraging OCR and machine learning techniques for automated metadata generation for **Amazon ML Challenge.**

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, Swift, C

Software Engineering & Web: React.js, Next.js, Node.js, FastAPI, Firebase, Cloud Firestore, Data Structures & Algorithms, OOP, DBMS, REST APIs, Git, GitHub Actions, CI/CD, debugging, testing, TypeScript strict mode, ESLint, authentication, RBAC, Agile, Scrum

Cloud, Frameworks & Databases: Google Cloud Platform (GCP), Microsoft Azure, Firebase, MongoDB, MySQL

Developer Tools & Platforms: GitHub Copilot, VS Code, Android Studio, Postman, Anthropic Claude, OpenAI Codex, Gemini CLI, Automation Anywhere, n8n, Workflow Automation

Artificial Intelligence & Data Science: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative AI, Prompt Engineering, Data Analytics, Predictive Modeling

Blockchain & Emerging Technologies: Solidity, Smart Contracts, Avalanche & Algorand Blockchain, Web3

Data Analytics & Visualization: Power BI, Microsoft Excel

Leadership & Product Skills: Product Development, Technical Project Leadership, Stakeholder Management, Community Building

Certifications: Career Essentials in **Generative AI by Microsoft and LinkedIn**, Introduction to Generative AI by **Google Cloud** in Coursera, MongoDB University - Students Cohort

Awards & Honors: Google Agentathon 2025 - **Guinness World Record Participant Achievement** (2089+ Most Participants in an Agentic AI Hackathon), **Microsoft Learn Guest Speaker** for four sessions on emerging AI technologies at Microsoft Campus and delivered technical talks at multiple engineering colleges and 15+ technical events engaging 3000+ students and professionals.

Community Leadership: Google Developer Student Clubs WoW Hyderabad, Microsoft Learn Student Ambassador, GeeksForGeeks Ambassador, Google Crowdsourcing Contributor, Google Cloud Arcade Member (for 4 Cohorts)
